

The only
limit is
your own
imagination

Welcome to the Edutouch Early Years technology range.

Designed with simplicity in mind, our education products provide classrooms with a range of interactive collaboration opportunities and are ideal for all stages of the curriculum.

SPECIFICATION

- LED specification
- Screen size 32 inch
- Highest resolution 1920x1080P
- Response time 5 ms
- Android specification
- CPU RK3288
- Memory 6 GB
- SSD 32GB
- Operating system Android
- Speaker 10 W stereo HD 8-channel (7.1) audio system
- Graphics integrated
- Wi-fi high quality wi-fi module (802.11 B/G/N)
- Windows specification
- CPU intel i5
- Memory 4 GB
- SSD 120 GB
- Operating system Windows 10
- Wi-fi High quality wi-fi module (802.11 B/G/N)
- 10 point capacitive touch (anti-strike)
- Port USB, LAN, RJ-45, HDMI, VGA,
- DC, AUDIO

DUAL OS

Experience the most versatile commercial touch screen table on the market. With a choice of either Android or both Android & Windows operating systems installed on the interactive PC it cannot be beaten on flexibility. Seamlessly switch from your Windows desktop to the Android apps; this screen has it all in one convenient package.

10 POINT TOUCH

Having up to 10 touch points allows for a wider variety of applications than ever before. This kind of functionality allows you to manipulate images, zoom in and out as well as perform many other touch gestures, much like you would with a domestic tablet. It also allows for multiple users to interact with the screen simultaneously.

LED BACKLIGHT

The LED backlight used is not only eco-friendly but also ensures the display has enhanced brightness and contrast. This technology increases the lifespan and reduces the power consumption by around 30%. This form of light technology is mercury free, safeguarding this screens eco-friendliness.

PCAP TOUCH

State-of-the-art projected capacitive interactive technology offers the most responsive and sensitive touch experience available. Designed for commercial applications, PCAP touch technology works by fixing a sensor grid between the glass surface and the LCD panel. When a finger touches the glass the grid detects the coordinates of the touch point.

Unlike other touch technology PCAP is not affected by dust or debris on the screen surface, allows for up to 10 touch points and offers superior optical quality.

FULLY BESPOKE

The device can be offered in a wide range of colours and can be customised to your specific requirements with logos, colours and graphics if required. We also offer the device in just a screen format which can be used for wall mounted requirements or other applications, such as desks, tables and much more.

Our standard specification is below, however, we can upgrade this for you if you required.

BRINGING TECHNOLOGY TO THE TABLE

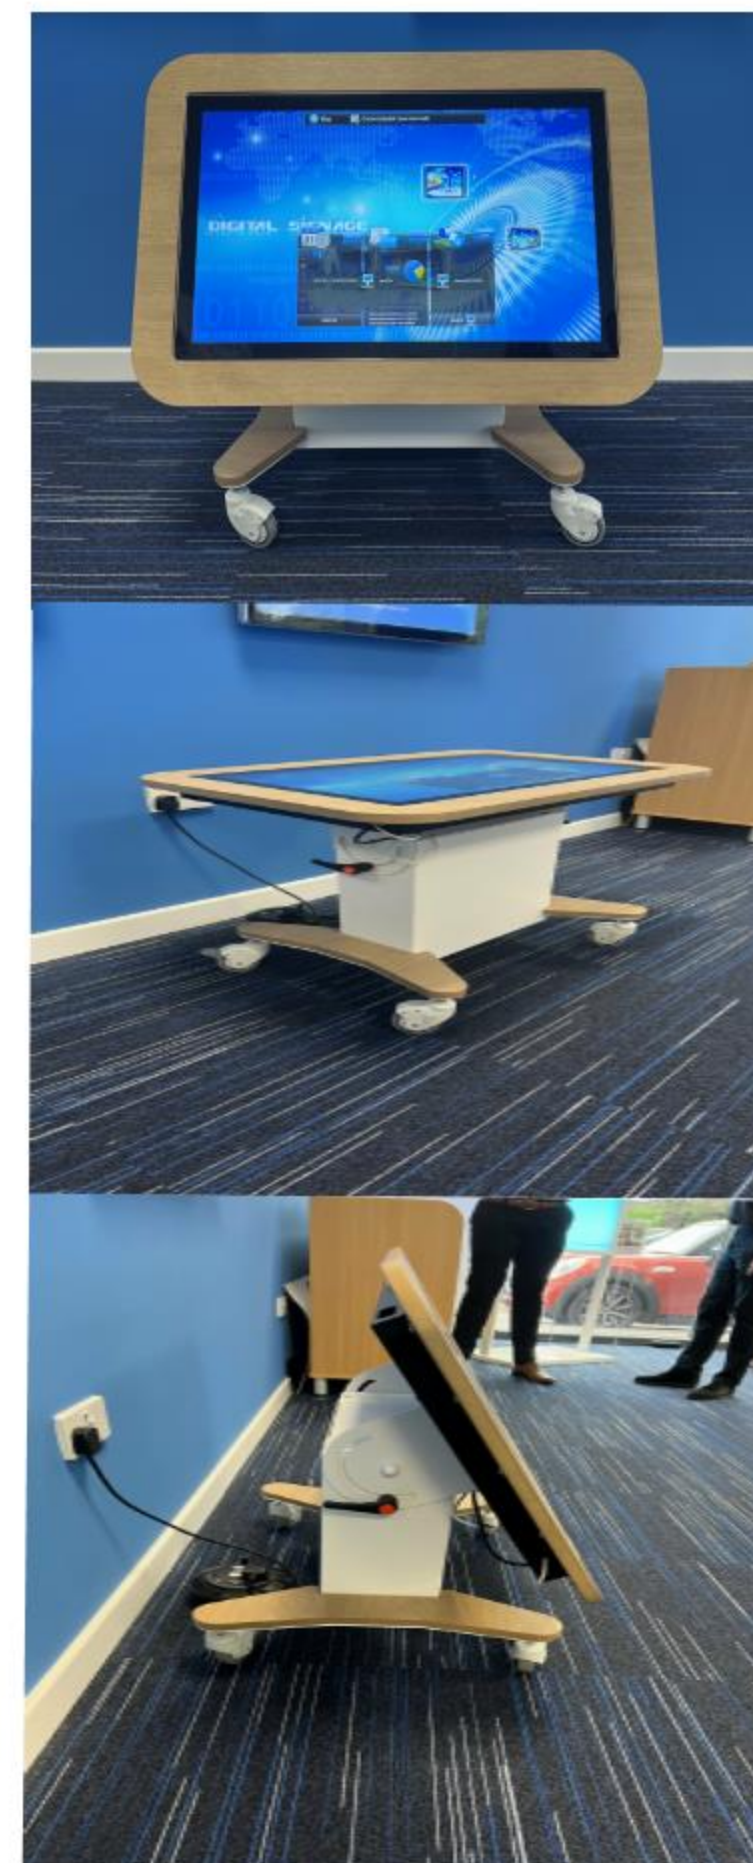

With PCAP technology the device offers the most responsive and sensitive touch experience available. The screen supports multi-touch which enables multiple users to use the table and is a truly collaborative device for children to learn on.
