

# ITT Mini Bot & Iris Stack

The ITT Mini Bot is an intelligent robot vacuum that sweeps & vacuums surfaces.

The I.R.I.S holds 8 Mini Bots for easy transportation and distribution, and it is a fully lockable and secure unit.

All the functions are selected from a remote control: the switching ON and OFF times are programmed, different paths and types of cleaning can be done with a simple click.

The side brushes collect dust and debris by conveying them to the centre where the roller collects in the dust bin. Above the dust bin there are 3 filters with final HEPA filter.

When the ITT Mini Bot has a low battery, it automatically turns off the suction motor and the roller/ brush motor and returns to the charging station. Once fully charged, it starts working for another 120 minutes.

Specification	ICE Mini Bot
Dust Bin Capacity	0.5 Ltr
Water Tank Capacity	0.4 Ltr
Run Time	120 mins
Climbing Height	1.5 cm
Noise Level	54 dBA
Power	28 W
Weight	3 Kg
Dimensions (L X H)	32.5 x 8 cm
Productivity (Vacuum)	300 sqm/hour
Productivity (Mop)	50 m2 per tank
